LEGAL NOTICE & DISCLAIMERS

REMOTE ESTIMATE — VERIFY BEFORE USE

Measurements in this report are estimated from aerial imagery and third-party property data, and may differ from actual field conditions. This is not an inspection, survey, appraisal, engineering or architectural opinion, structural assessment, code-compliance review, or insurance determination. Verify independently before ordering materials, pricing work, or beginning construction. Never rely on this report as the sole basis for structural or life-safety decisions.

The measurements, diagrams, and data in this report were not obtained through a physical, on-site inspection. Remote measurement carries inherent tolerances: completeness and precision depend on the age, resolution, and coverage of the available imagery, on obstructions such as trees, shadows, snow, and rooftop equipment, on roof complexity, and on changes to the property not reflected in the source data. No off-site measurement, from any provider, is exact, and no particular accuracy or tolerance is guaranteed here.

Direct any questions about this report to whoever provided it to you.
